

TECHNICAL QUESTIONS AND ANSWERS

SOLICITATION N66001-04-R-0028

MARKER ASSEMBLIES AND

ACOUSTIC TRANSPONDER BOTTLES

PART 5

26	Q	<p>Will the CLINs be ordered in a manner that is cumulative in nature or by production lot quantity?</p> <p>For example, refer to page 3 of the solicitation, if someone wants 50 of CLIN 0001 do they order 19 of CLIN 0001AB and then 30 of line 0001AC, or do they simply order 50 of CLIN 0001AD?</p> <p>What CLIN would they use if they ordered 3 a month later?</p> <p>Please explain how the total is derived on the pricing sheets. We have read the explanation and it is still unclear. Do we add the total from each line, or just the total from the last line each CLIN?</p>
	A	<p>It is the Government's intent to purchase in production lots to the maximum extent possible. That is we intend to purchase a large number on the initial buy only constrained by the availability of funds. That purchase could conceivably come from CLIN 0001AF (Production Lot 200 & over). In future years we may purchase in smaller lots. In any case, the Contractor should be able to recoup his setup costs in the initial buy.</p>
27	Q	<p>The following drawings were not supplied on the government supplied CD.</p> <p>0207245 Mold Assy Side A</p> <p>0207246 Mold Assy Side B</p>
	A	<p>Although the two subassembly drawings of 0207245 and 020746 are not present in the drawing package, they are referred to in the exploded view of 0207244, MOLD ASSY, BULKHEAD. This drawing, 0207244, does not have dimensions nor tolerances, but there should be enough information in this exploded view so that a machinist can estimate the fabrication cost of these pieces. Please bid the package per your estimate.</p>
